I am writing to apply for the Remote Data Entry Specialist - Assistant Administrator position at Recruit Lytics Hiring. Your description of a detail-oriented, organized role supporting data management and administrative operations aligns with my approach to structured work and reliable information handling.

Through my work as a software engineer, I have developed strong habits in data accuracy and record management. Working with databases like MySQL, PostgreSQL, and MongoDB required me to input, update, and verify data consistently while maintaining structured digital files. I am comfortable following structured processes and performing routine checks to ensure data quality.

In previous roles, I supported administrative workflows by maintaining trackers, logs, and reporting documents. I coordinated tasks across teams, reviewed incoming requests, and communicated clearly about updates and pending items. My experience with documentation and workflow improvements has prepared me to assist with the administrative support responsibilities outlined in this role.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and welcome the opportunity to discuss how I can contribute to your team.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
