I am writing to express my interest in joining the freelance designer roster at Awesomehues. Your emphasis on core values and empowering candidates to grow into a role resonates with me. I appreciate that PixelPiew focuses on research-driven design for financial services, B2B, and non-profit organizations, and I would welcome the opportunity to contribute to meaningful brand and digital projects.

My background is in full-stack development and AI engineering, but I have always approached design as a core part of building products. I have hands-on experience with Figma, Tailwind CSS, MaterialUI, and Bootstrap, and I have designed responsive, accessible interfaces for several web and mobile applications. I understand how design decisions affect usability, performance, and user retention, and I bring that perspective to every project.

One area where I have applied UX thinking is in building a travel agency platform. I designed the full user interface using Next.js, Tailwind CSS, and Google Maps integration, ensuring the experience was intuitive across multiple languages and currencies. I also worked on an AI-powered real estate app where I contributed to the UI design and user flow, focusing on clarity and ease of navigation.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV and portfolio for your review. I look forward to the possibility of working with PixelPiew on future design projects.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
