I am writing to apply for the Remote Game Tester position at JobsInMass.com. The opportunity to test new games across multiple platforms and contribute directly to improving player experiences aligns well with my background in software quality and detailed analysis.

Through my work as a software engineer, I have developed a methodical approach to testing and debugging. I am comfortable identifying bugs, documenting them clearly, and providing actionable feedback on user interface and gameplay mechanics. My experience working across web and mobile applications has trained me to spot inconsistencies and usability issues that others might overlook.

In my professional experience, I have regularly tested application features, reported glitches, and collaborated with development teams to resolve issues before release. I am skilled at managing testing schedules independently and communicating findings in a structured way that helps developers act quickly.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the chance to discuss how I can contribute to your quality assurance process.

Sincerely,

Md Shahanur Islam Shagor
