I am writing to apply for the Learn More position at Get Vetted. While the job description focuses on reporting about a universal childcare program in New Mexico, I understand that the role likely requires strong technical and analytical capabilities to support such initiatives.

Through my professional experience as a full-stack developer, I have built scalable web applications using Laravel, Next.js, React, and Node.js. I have developed RESTful APIs, implemented secure authentication systems with role-based access control, integrated payment gateways, and optimized database performance through query tuning and caching strategies.

In my previous role at Explo-IT, I delivered real-time features including chat and live notifications using WebSockets, deployed applications on Linux servers with Docker and Nginx, and set up CI/CD pipelines for efficient delivery. I also worked on responsive, SEO-friendly interfaces using Tailwind CSS and modern JavaScript frameworks.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background can contribute to Get Vetted’s work.

PROFOUND RMTU5LjE5OC42Ni4xNjM=

Sincerely,

Md Shahanur Islam Shagor
