I am writing to apply for the WEG / Immobilienbuchhalter position at Phoenix Personalvermittlung GmbH. The role's focus on precise financial administration and structured data management is something I find well-aligned with my technical background.

Although my career has been in software engineering, I have developed strong competencies in data accuracy, systematic workflows, and financial transaction processing. Through my work building full-stack applications, I have handled complex data structures, payment integrations, and reporting systems that require the same level of precision and reliability expected in property accounting.

One area that particularly interests me is the management of financial data and the creation of accurate reconciliations. In my professional experience, I have worked extensively with MySQL and PostgreSQL databases, ensuring data integrity, performing detailed audits, and building systems that track financial flows. This has given me a methodical approach to handling numbers, verifying records, and maintaining organized documentation.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am confident that my analytical mindset, attention to detail, and IT proficiency would allow me to quickly adapt to the specific requirements of this role. I have attached my CV for your review and welcome the opportunity to discuss how my background can contribute to your team.

Sincerely,

Md Shahanur Islam Shagor
