I am writing to apply for the Programmmanager militˆrische Nutzung Weltraum position at K-tronik GmbH. The role combines strategic program management with defense and space technology, which aligns with my technical background and research focus on secure autonomous systems.

Through research and development work, I have designed and built systems for UAV coordination, sensor fusion, and secure communication in GPS-denied environments. These projects required evaluating technical feasibility, managing cross-functional requirements, and ensuring system resilience under adversarial conditions, which directly relates to managing complex defense and space programs.

A relevant example is my work on OmniGuard V2X, a privacy-preserving blockchain framework for autonomous vehicle networks. This project involved cryptographic data integrity, decentralized coordination, and real-time threat mitigation, all of which are relevant to secure space-based systems and military-grade communication.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background can contribute to K-tronik’s defense and space initiatives.

Thank you for your consideration.

Sincerely,

Md Shahanur Islam Shagor
