I am writing to apply for the Projektleiter:in position at Solartechnik Thiemann. Your focus on delivering custom solar systems and wallbox solutions with precision and reliability aligns with how I approach technical project delivery.

Through my professional experience, I have led the planning and execution of full-stack web development projects from initial requirements through deployment. This involved coordinating with internal teams and external partners, managing project budgets and timelines, and ensuring that all deliverables met quality and safety standards before release.

One area that particularly interests me is the opportunity to work on renewable energy projects at Solartechnik Thiemann. My technical background gives me a solid foundation for understanding the systems and workflows involved in solar installations, and I am comfortable communicating technical details clearly with both team members and customers.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I would welcome the chance to discuss how my project management and technical experience can contribute to your team. I have attached my CV for your review.

Sincerely,

Md Shahanur Islam Shagor
