I am writing to apply for the Brand Associate (m/w/d) role at Nero GmbH. What stands out to me about Nero is the ambition to build a new beverage category around ready-to-drink Matcha with a community-first approach. I find the combination of creator-driven marketing, offline activations, and direct collaboration with founders genuinely compelling.

My professional background is in software engineering, where I have spent over four years building full-stack web applications and leading technical projects from concept to deployment. This experience has given me a structured approach to project coordination, a comfort with fast-changing priorities, and a habit of taking ownership from day one. I am used to working in small teams where everyone contributes directly to the outcome.

One area that particularly interests me is the operational side of brand building. In my previous work, I have coordinated multi-step workflows, managed timelines across different stakeholders, and ensured that deliverables are completed on schedule. I am confident I can apply the same discipline to planning shoots, coordinating creators, managing seeding campaigns, and supporting retail marketing initiatives.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my background in project coordination and hands-on execution can contribute to building Nero’s brand presence.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
