I am writing to apply for the Product Growth Expert Acquisition position at Neon Pagamentos. Your focus on using data to drive customer engagement and operational efficiency in a fintech environment is particularly interesting to me.

My technical background is rooted in full-stack development, with strong experience in SQL-based data modeling and analysis. I have worked with MySQL and PostgreSQL extensively, extracting and manipulating complex datasets to support product decisions. This analytical foundation allows me to connect technical metrics directly to business outcomes.

In my professional experience as a Web Developer, I built and optimized database queries, implemented caching strategies, and developed real-time features using WebSockets. I have also architected automation solutions for data collection and processing, ensuring recurring analyses operate with speed and accuracy. This hands-on work with data pipelines and performance optimization directly supports the responsibilities outlined for this role.

One area that particularly interests me is building frameworks for experimentation and KPI governance. Through my project work on the AI-Powered Financial App, I developed APIs that processed user data, integrated AI assistants, and automated PDF generation and email delivery via AWS SES. This required translating complex technical workflows into clear, actionable outputs for stakeholders.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background can contribute to Neon’s growth.

Thank you for your consideration.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
