I am writing to apply for the Property Maintenance & Operations Coordinator position at Dart. The role requires someone who can maintain properties, equipment, and systems to a high operational standard while responding quickly to urgent issues. I bring strong problem-solving skills, hands-on technical experience, and a proactive maintenance-first mindset.

Through my work in software engineering and hardware projects, I have developed a systematic approach to troubleshooting and maintenance. I have worked with Linux servers, Docker containers, Nginx configurations, and CI/CD pipelines, which require constant monitoring, preventative upkeep, and rapid issue resolution. I am comfortable diagnosing faults, replacing components, and ensuring systems remain reliable under pressure.

I have hands-on experience with hardware platforms including Raspberry Pi, ESP32, and NVIDIA Jetson Nano. These projects involved assembling, configuring, and maintaining physical systems, performing electrical connections, and troubleshooting hardware failures. I am used to working with tools, maintaining equipment, and keeping detailed records of maintenance activities.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am flexible with scheduling, including evenings, weekends, public holidays, and on-call rotations. I am comfortable working outdoors and near water. I have attached my CV for your review and welcome the opportunity to discuss how I can contribute to the Arboretum Services team.

Sincerely,

Md Shahanur Islam Shagor
