I am writing to express my interest in joining Common Energy. Your mission to reshape the energy system through community solar projects that replace fossil fuels with local, clean energy is both timely and meaningful. I appreciate the collaborative culture described by your team and would welcome the opportunity to contribute to your technical efforts.

As a full-stack developer with over four years of professional experience, I have built and maintained production web applications using Laravel, Next.js, React, and TypeScript. My work has involved designing RESTful APIs, implementing secure authentication and role-based access control, optimizing database queries with MySQL, and creating responsive, user-friendly interfaces. These skills directly support the development of customer-facing platforms and internal tools that serve diverse user groups.

In previous work, I delivered real-time features such as chat and notifications using WebSockets, integrated third-party services including payment gateways and cloud storage, and deployed applications on Linux servers with Docker and CI/CD pipelines. I also built a full-stack multi-vendor e-commerce ecosystem using Laravel and Flutter, which required coordinating multiple user roles and ensuring reliable data flow across the system.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background can support Common Energy’s goals.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
