I am writing to apply for the Frontend Developer Junior position at Universia Perˆ”. The opportunity to work with modern frontend technologies like Next.js and Strapi while contributing to digital solutions aligns well with my development experience.

Through my professional work as a Web Developer, I have built and maintained web applications using JavaScript, Next.js, and Tailwind CSS. I have also worked with Strapi as a headless CMS, which directly matches the technology stack mentioned in the job description. My focus has been on creating responsive, user-friendly interfaces that work well across devices.

A relevant example is the Travel Agency App I developed for 2Expedition, where I used Next.js with TypeScript, Tailwind CSS, and integrated Google Maps. The project required building a full-stack solution with multi-language and multi-currency support, demonstrating my ability to work with modern frontend tools and deliver complete digital experiences.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my skills can contribute to the team at Universia Perˆ”.

Sincerely,

Md Shahanur Islam Shagor
