I am writing to apply for the Web Developer position at Ravi. With over 4 years of professional experience building full-stack web applications, I am confident I can contribute effectively to your team.

My technical background centers on Laravel and Next.js, which I have used extensively to build scalable, secure, and responsive web platforms. I work with PHP, JavaScript, TypeScript, Tailwind CSS, and MySQL on a daily basis, and I am comfortable with the full development lifecycle from requirements to deployment.

In my professional experience at Explo-IT, I designed and developed web applications using Laravel for the backend and Next.js for the frontend. I built RESTful APIs, implemented authentication and role-based access control, integrated payment gateways, and optimized database queries for better performance. I also deployed applications on Linux servers using Nginx, Docker, and CI/CD pipelines.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I look forward to the possibility of contributing to Ravi’s projects.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
