I am writing to apply for the Executive position at Lupin. Although my professional background is in software engineering and AI, I have consistently demonstrated strategic agility, result orientation, and process excellence while delivering complex technical projects.

In my work as a full-stack developer, I have led end-to-end product delivery, collaborated with cross-functional teams, and managed stakeholder expectations across multiple projects. These experiences have sharpened my ability to align technical execution with business goals, drive innovation, and maintain a strong customer-centric focus.

One area that particularly interests me is the emphasis on developing talent and fostering collaboration. I have mentored junior developers, conducted code reviews, and contributed to team knowledge-sharing sessions. I believe this aligns well with the competencies Lupin values.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills and experience can contribute to Lupin’s success.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
