I am writing to express my interest in opportunities within the nuclear industry at Orano. Your focus on safety, security, and mission-critical operations aligns with my background in building reliable systems for complex environments.

Through my work in software engineering and autonomous systems, I have developed strong analytical and problem-solving abilities. I am comfortable making decisions under pressure, assessing risks, and adapting to changing requirements. These skills transfer directly to the nuclear sector, where precision and reliability are essential.

In previous roles, I have worked across multidisciplinary teams to deliver secure, well-tested systems. I bring a practical approach to risk management, attention to detail, and a commitment to operational excellence. I am used to taking ownership of tasks and following through until completion.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my background can contribute to Orano’s projects.

Sincerely,

Md Shahanur Islam Shagor
