I am writing to apply for the Operator position at Genuit Group. Your commitment to building a low-carbon business and delivering sustainable solutions at scale is something I find genuinely meaningful.

My background includes hands-on experience with server operations, deployment, and system monitoring. I have worked extensively with Linux servers, Docker, Nginx, and Apache, and have set up CI/CD pipelines to ensure smooth and reliable application delivery. I am comfortable managing production environments and troubleshooting issues under real-world conditions.

One area that particularly interests me is real-time system monitoring. I built a full-stack server monitoring dashboard that tracked the health, availability, and latency of multiple services simultaneously, streaming live metrics to the browser using Socket.IO. This project gave me practical experience in maintaining operational visibility and responding to system changes quickly.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to the Genuit Group team.

Sincerely,

Md Shahanur Islam Shagor
