I am writing to apply for the Owner position at Cultur'Elles - L'association des femmes du minist^¤re de la Culture. Your organization's mission to support women within the Ministry of Culture is meaningful, and I would welcome the opportunity to contribute my technical and organizational skills to your work.

Through my professional experience as a full-stack and AI engineer, I have developed a broad technical foundation that allows me to take ownership of complex projects from start to finish. I have worked extensively with Laravel, Next.js, React, Node.js, and TypeScript, building production-grade web applications that handle authentication, payment integration, real-time features, and database optimization. I am comfortable making architectural decisions, managing deployments, and ensuring that systems remain maintainable and scalable over time.

One area that particularly interests me is the ability to manage end-to-end project delivery. In previous work, I have designed and developed full-stack platforms including a multi-vendor e-commerce ecosystem and an AI-powered real estate application. These projects required me to coordinate across frontend and backend layers, integrate third-party services, handle role-based access control, and deploy on cloud infrastructure. I approach each project with a focus on reliability, performance, and clear communication with stakeholders.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
