I am writing to apply for the Payroll Specialist position at ADP. While my professional background is in software engineering and full-stack development, I am drawn to this opportunity because of ADP's reputation as a global leader in payroll and HR solutions. I am eager to bring my analytical mindset, attention to detail, and rapid learning ability to a role that requires precision and reliability.

Through my work as a web developer, I have developed strong skills in data management, system optimization, and process automation. I have worked extensively with databases such as MySQL and PostgreSQL, building efficient queries and ensuring data integrity. These experiences have given me a solid foundation for handling structured data accurately, which is essential in payroll processing.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am a quick learner and have consistently adapted to new technologies and workflows throughout my career. I am confident that I can quickly master UK Payroll processing and contribute to ADP's team with dedication and accuracy.

I have attached my CV for your review and welcome the opportunity to discuss how my skills can support ADP's operations.

Sincerely,

Md Shahanur Islam Shagor
