I am writing to apply for the Founders Associate position at BarBrain GmbH. Your work in digitizing inventory processes for restaurants, bars, and hotels through a scalable SaaS platform is impressive. The opportunity to work directly with the founding team and contribute across operations, strategy, and product development aligns well with my background and career goals.

My professional experience has been shaped by working in startup and tech environments where I wore multiple hats. At Explo-IT, I worked closely with stakeholders on product delivery, backend features, and frontend improvements. This required me to move between technical execution, process planning, and stakeholder communication on a daily basis. I am comfortable taking ownership of projects, structuring workflows, and supporting strategic decisions.

One area that particularly interests me is the combination of operational responsibility and strategic project work described in the role. In my previous work, I have planned and implemented new product features, optimized internal processes, and prepared analyses and presentations for decision-making. I am used to working in fast-moving settings where priorities shift and the team relies on clear communication and reliable execution.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to BarBrain’s growth as a Founders Associate.

Sincerely,

Md Shahanur Islam Shagor
