I am writing to apply for the Praktikant Venture Development position at CKM Group. Your mission to reshape healthcare through preventive medicine, eHealth, and digital diagnostics resonates with my own interest in building technology that has real human impact. I am particularly drawn to the entrepreneurial nature of this role and the opportunity to contribute to a new HealthTech venture from an early stage.

Through my work as a full-stack developer and my studies in software engineering, I have developed a practical, analytical approach to building products. I enjoy digging into data, identifying patterns, and translating those insights into actionable strategies. Whether it was optimizing database queries for a multi-vendor e-commerce platform or designing AI-powered features for a financial app, I have consistently focused on understanding user needs and delivering solutions that work in practice.

One area where I have gained relevant experience is in supporting go-to-market efforts. While developing a travel agency platform, I worked closely with the team to understand customer behavior, localize content for multiple languages and currencies, and improve the overall user experience. This required not only technical skills but also a willingness to listen, adapt, and take ownership of outcomes.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am eager to bring my analytical skills, entrepreneurial mindset, and hands-on development experience to CKM Group. I have attached my CV for your review and would welcome the chance to discuss how I can contribute to your team.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
