I am writing to apply for the Teilzeit Buchhaltung 20h (m/w/d) position at Eneto GmbH. Your mission to make sustainable building technology accessible and affordable is a meaningful one, and I would like to contribute to building the clean financial structures that support your growth.

Although my primary expertise is in software engineering, I have developed strong analytical and organizational skills through my technical work. Building and maintaining complex systems requires precision, attention to detail, and the ability to manage multiple data streams accurately. These are the same qualities needed for reliable accounting and billing processes.

I am currently studying Software Engineering at Voronezh State University of Forestry and Technology, which has reinforced my structured approach to problem-solving and data management. I am comfortable working with numbers, categorizing information, and ensuring accuracy in repetitive tasks. I am also fluent in English and Bengali, with working knowledge of Russian, and I communicate clearly in writing.

What attracts me to Eneto is the combination of startup speed with a grounded mission in the energy sector. I appreciate that you offer real responsibility from day one and flexible hours that respect study commitments. I am looking for a role where I can contribute meaningfully while continuing my education.

I have attached my CV for your review. Thank you for considering my application.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
