I am writing to apply for the Steuerberater position at Taxtalente.de. While my professional background is in software engineering rather than tax consulting, I bring strong analytical skills, a careful and thorough approach to complex systems, and a proven ability to work with digital tools and processes.

Through my work as a full-stack developer, I have built and maintained scalable web applications using Laravel, Next.js, React, and Node.js. I am comfortable working with databases such as MySQL and PostgreSQL, and I have experience deploying and managing applications on Linux servers with Docker and Nginx. This technical foundation allows me to quickly adapt to new digital platforms and workflows.

One area that particularly interests me is the opportunity to work in a modern, digitally oriented firm. I have experience integrating third-party services, building real-time features, and optimizing application performance. I am confident I can contribute to a team that values efficiency and modern tools.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
