I am writing to express my interest in the Steuerberater position at Taxtalente.de. While my professional background is in software engineering rather than tax consulting, I understand the importance of connecting qualified professionals with the right opportunities in a specialized field like tax advisory.

Through my work as a full-stack developer, I have built scalable web applications and AI-powered platforms using technologies such as Laravel, Next.js, React, Node.js, and MySQL. I have experience implementing role-based access control, payment integrations, real-time features, and secure authentication systems. I am comfortable working with digital tools and modern workflows, which aligns with the emphasis on a digital working environment mentioned in the job description.

In my professional experience as a Web Developer at Explo-IT and DataSoft LTD, I delivered end-to-end solutions, collaborated with stakeholders, and maintained production systems on Linux servers with Docker and CI/CD pipelines. I have also worked on projects involving AI assistants, real-time communication engines, and multi-role platforms, which required careful attention to detail, clear communication, and reliable delivery.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my background in building digital platforms and working with diverse teams could contribute to your partner firm in Gransee.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
