I am writing to express my interest in the Steuerberater position at Taxtalente.de. While my professional background is in software engineering, I bring strong digital workflow expertise and a methodical approach to complex problem-solving that aligns well with your requirement for openness to a digital working style.

Through my professional experience as a Web Developer, I have built and maintained scalable web applications using Laravel, Next.js, and React. I have implemented role-based access control systems, secure payment gateways, and real-time features using WebSockets. This experience has given me a disciplined approach to building reliable, secure systems that handle sensitive data with care.

One area that particularly interests me is the emphasis on digital processes and modern equipment in your partner firm. I have worked extensively with Linux servers, Docker, Nginx, and CI/CD pipelines, and I am comfortable adapting to new digital tools and workflows quickly. My experience deploying and maintaining production applications has taught me the importance of thorough testing, documentation, and attention to detail.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my digital expertise and structured approach could contribute to your partner firm in Kolkwitz.

Sincerely,

Md Shahanur Islam Shagor
