I am writing to express my interest in the Steuerberater (m/w/d) position with one of your partner firms in Buseck. While my professional background is in software engineering rather than tax consulting, I bring a strong analytical mindset, a careful and efficient working style, and genuine openness to digital workflows.

One area that particularly interests me is the opportunity to work in a firm that values modern, digital processes. In my previous work as a web developer, I have consistently focused on building efficient, well-structured systems and maintaining clear communication with stakeholders. These habits translate naturally into tax advisory work, where precision, reliability, and client communication matter most.

Through my professional experience, I have developed a disciplined approach to handling complex tasks, reviewing work carefully, and taking ownership of outcomes. I am comfortable working independently and collaborating within teams. I am also fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy working in international environments.

I am interested in learning more about how I could contribute to your partner firm in Buseck. I have attached my CV for your review and would welcome the opportunity to discuss my application further.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
