I am writing to express my interest in the Technical Lead position at IT FUTURZ. With a strong background in full-stack development and system architecture, I am prepared to contribute to your team's technical direction and project delivery.

My professional experience spans over four years of building and leading web application development using Laravel, Next.js, React, and Node.js. I have designed scalable RESTful APIs, implemented role-based access control, integrated secure payment gateways, and optimized database performance through Eloquent query tuning and caching strategies. This technical foundation allows me to guide development teams in delivering robust, maintainable systems.

In previous work, I have taken ownership of full application delivery from architecture design to deployment. I have worked with Linux servers, Docker, Nginx, and CI/CD pipelines to ensure reliable production environments. I have also delivered real-time features using WebSockets and managed third-party integrations including payment gateways, social logins, and cloud storage services.

One project that reflects my approach is the Multivendor E-commerce Management Ecosystem, where I built a Laravel-based backend with role-based access control, Redis caching, and Firebase notifications, paired with Flutter mobile apps for different user roles. This project required coordinating multiple stakeholders and ensuring consistent performance across web and mobile platforms.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and welcome the opportunity to discuss how my experience aligns with the Technical Lead role at IT FUTURZ.

Sincerely,

Md Shahanur Islam Shagor
