I am writing to apply for the Error Odio position at Innodrei. With professional experience in full-stack development and a strong foundation in modern web technologies, I am confident in my ability to contribute effectively to your team.

My primary expertise lies in building scalable web applications using Laravel on the backend and Next.js with React on the frontend. I have worked extensively with TypeScript, JavaScript, Tailwind CSS, and MySQL to deliver responsive, secure, and performant systems. My work includes implementing RESTful APIs, authentication flows, role-based access control, and real-time features using WebSockets.

In previous professional roles, I have been responsible for the full development lifecycle from designing database schemas and optimizing Eloquent queries to deploying applications on Linux servers with Nginx, Docker, and CI/CD pipelines. I have integrated third-party services such as payment gateways, social logins, and cloud storage, and I consistently focus on code quality, security, and maintainability.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills and experience can contribute to Innodrei. Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
