I am writing to apply for the Creative Strategist role at Happy Mammoth. Your focus on performance creative and direct-response strategy for a growing health brand is exactly the kind of data-driven challenge I want to be part of.

My professional experience is in full-stack development and AI engineering, where I have built systems that rely on data-driven decisions and structured experimentation. I understand how to translate metrics like CTR, CPA, and ROAS into actionable creative strategies.

In previous work, I have developed platforms that required continuous iteration based on user behavior and performance data. I am comfortable owning results, not just deliverables, and I know how to move fast, test often, and scale what works.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
