I am writing to apply for the Werkstudent (gn) position in Hochbau with a focus on Kalkulation & Arbeitsvorbereitung at OST BAU. As a Software Engineering student with a strong foundation in structured problem-solving and technical documentation, I am interested in contributing to your team while gaining practical experience in the construction industry.

Through my academic work in software engineering, I have developed a systematic approach to handling complex data, performing detailed calculations, and maintaining organized documentation. These skills translate directly to the responsibilities of Mengenermittlung, Aufmaˆ unterlagen, and Baustellendokumentation described in the role. I am comfortable working independently with precision and ensuring that all records are traceable and well-structured.

One area that particularly interests me is the combination of technical and organizational tasks in this position. In my previous project work, I was responsible for preparing data, documenting workflows, and supporting team leads with administrative and technical coordination. I am confident that this experience will allow me to support your Kalkulation and Bauleitung teams effectively from the start.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am eager to bring my analytical mindset and structured working style to OST BAU. I have attached my CV for your review and look forward to the possibility of discussing how I can contribute to your team.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
