I am writing to apply for the Junior Ailance Application Support Specialist position at 2B Advice GmbH. Your SaaS platform for data privacy, governance, risk, and compliance addresses a critical need in today's regulatory environment, and I am interested in contributing to a team that builds and supports such a product.

Through my work in full-stack development, I have gained a solid understanding of how SaaS applications function from the inside out. I am comfortable working with user roles, permissions, workflows, form configurations, and data structures. My technical background allows me to quickly grasp how different parts of a platform interact, which is essential for diagnosing whether an issue is a user error, a configuration problem, or a technical bug.

In my professional experience as a Web Developer, I regularly handled support requests, reproduced reported issues, and documented findings for the development team. I learned to ask the right questions upfront, prioritize cases based on impact, and ensure that every interaction left the customer with a clear understanding of the next steps. I also contributed to internal documentation and FAQs to reduce recurring questions.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am looking for a role where I can grow into a product expert over time, and Ailance offers exactly that path. I have attached my CV for your review and would welcome the opportunity to discuss how I can support your team and customers.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
