I am writing to apply for the Creative Operations Manager position at Stio. The role's focus on building efficient systems, managing creative workflows, and championing AI adoption aligns with my experience in designing and optimizing operational processes.

What stands out to me about Stio is the commitment to mountain lifestyle and responsible stewardship. I share these values and appreciate the emphasis on building systems that enable great creative work while respecting the resources that make it possible.

Through my professional experience, I have built and maintained project management systems that keep teams running at full capacity. I have owned full project pipelines from brief intake through final delivery, managing priorities, timelines, and stakeholder alignment across multiple workstreams. I have also facilitated project kick-offs, weekly check-ins, and milestone reviews with clear agendas and action-oriented follow-ups.

One area that particularly interests me is the opportunity to champion AI tools across the creative team. I have hands-on experience integrating AI into production workflows, including building AI-powered assistants and automating repeatable tasks. I am comfortable experimenting with new tools and identifying opportunities to streamline production and improve output quality.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my experience can contribute to Stio's creative operations.

Thank you for your consideration.

Sincerely,

Md Shahanur Islam Shagor
