I am writing to apply for the Werkstudent Social Media Marketing position at Kintscher GbR. The opportunity to work directly with founders in a high-performance tech environment, combining social media marketing with recruiting and business development, is exactly the kind of hands-on, impactful role I am looking for.

As a Full-Stack & AI Engineer currently pursuing my Bachelor's in Software Engineering, I bring a practical understanding of AI tools and a builder's mindset to this position. The job description emphasizes confident use of AI tools and a proactive, independent working style. In my project work, I have integrated OpenAI and Replicate APIs into production applications, giving me direct experience with the kind of AI-driven workflows this role requires. I am comfortable learning new tools quickly and applying them to real business problems.

One area that particularly interests me is the dual focus on social media marketing and recruiting. I have experience building platforms that manage user roles, authentication, and content workflows. This technical background gives me a solid foundation for understanding how to structure content strategies, manage posting schedules, and use data to improve visibility. I am eager to apply this structured thinking to develop and execute a LinkedIn content strategy that strengthens employer branding and attracts top talent.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am looking for a role where I can take ownership, contribute ideas, and grow quickly. This position at Kintscher GbR offers exactly that. I have attached my CV for your review and would welcome the opportunity to discuss how I can support your team.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
