I am writing to apply for the Head of Engineering Design position at Monika Moser, Executive Search. While my professional background is in software engineering rather than mechanical construction, I bring strong technical leadership, project management, and cross-functional coordination experience that directly aligns with the responsibilities of this role.

In my previous role as a Web Developer at Explo-IT, I led the delivery of full-stack web applications, coordinating closely with sales, development, and operations teams to ensure that technical solutions met both customer requirements and business objectives. I was responsible for prioritizing multiple concurrent projects, managing stakeholder expectations, and ensuring that deliverables were production-ready and scalable. This experience has given me a solid foundation in leading technical teams and driving product development from concept to deployment.

One area that particularly interests me is the emphasis on developing customer-specific solutions where function, material, quality, and cost must work together. In my work, I have consistently focused on building reliable, maintainable systems that balance technical excellence with practical business constraints. I am comfortable acting as a technical sparring partner, translating complex requirements into clear, actionable plans for engineering teams.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am confident that my technical project management skills, team leadership experience, and ability to drive structured development processes would allow me to contribute effectively to your team. I have attached my CV for your review and would welcome the opportunity to discuss how my background aligns with your needs.

Sincerely,

Md Shahanur Islam Shagor
