I am writing to apply for the Werkstudent Founders Associate - Social Media & Recruiting position at Kintscher GbR. The opportunity to work directly with founders in a high-specialization tech environment focused on cloud infrastructure and DevOps is particularly appealing to me.

My technical background combines full-stack development with a strong interest in AI tools. I have hands-on experience integrating AI assistants and automation into web applications, including building an AI-powered financial app that uses OpenAI models and AWS services for data processing and communication. This has given me practical familiarity with using AI to improve workflows and user engagement.

While my professional experience is in software engineering, I am highly adaptable and quick to learn new domains. I am comfortable with digital tools, content creation, and data-driven strategies. I have built and maintained responsive web platforms using Next.js and Laravel, which involved creating user-friendly interfaces and managing content effectively.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am eager to bring my technical mindset, AI affinity, and proactive working style to support your founders in social media marketing, recruiting, and business development. I have attached my CV for your review and look forward to the possibility of contributing to your team.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
