I am writing to apply for the Ausbildung zum Fachinformatiker/in â Anwendungsentwicklung position at ituma. Your focus on network automation, software-defined networking, and intelligent enterprise solutions aligns well with my background in full-stack development and my interest in building reliable, data-driven systems.

Through my professional experience as a Web Developer, I have worked extensively with PHP and Laravel to build and maintain web applications. I have programmed business processes, developed RESTful APIs, integrated external APIs, and worked on microservices architecture. This directly matches the core responsibilities outlined in your training program.

One area that particularly interests me is the development of frontend solutions for end customers. In previous projects, I have built responsive, SEO-friendly user interfaces using Next.js, React, and Tailwind CSS, ensuring a smooth experience across devices. I also have experience with quality management through testing tools like PHPUnit and Jest.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am ready to bring my existing skills to ituma and am equally committed to learning new technologies and contributing to your team’s success. I have attached my CV for your review and look forward to the possibility of discussing this opportunity further.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
