I am writing to apply for the Werkstudent (m/w/d) Digital Marketing & Social Media position at BEH+ Partnerschaft mbB Wirtschaftsprˆ…fer Steuerberater. Your focus on modernizing the digital presence of a forward-thinking tax firm is something I find genuinely interesting, and I would welcome the opportunity to contribute to that work.

Through my hands-on project development, I have built responsive, user-focused web interfaces using technologies like Next.js, React, Tailwind CSS, and JavaScript. These projects required me to think carefully about user experience, content structure, and visual consistency. I am comfortable creating and updating website content, and I understand how SEO and clean design work together to improve digital visibility.

One area that particularly interests me is the use of AI tools for content creation and idea generation. I have practical experience integrating AI assistants into real-world applications, including training models on custom datasets and using AI for image processing and text generation. I am confident I can apply this experience to support your content marketing and social media efforts effectively.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application, and I look forward to the possibility of contributing to the BEH+ team.

Sincerely,

Md Shahanur Islam Shagor
