I am writing to apply for the Senior SAP Project Manager position at Pertemps ERP. Your organization's role in driving SAP S/4HANA and ERP transformation projects across an international network is impressive, and I am interested in contributing to the continued expansion of your project landscape in Germany.

Through my professional experience as a Web Developer, I have led the delivery of multiple full-stack applications from initial scoping through to production deployment. This has given me practical experience in defining project goals, managing deliverables, coordinating resources, and maintaining clear communication with stakeholders. I have worked in both agile and structured environments, adapting project management approaches to fit the specific needs of each engagement.

A significant part of my work has involved moderating workshops to clarify requirements between business teams and technical teams, managing testing phases, and overseeing quality assurance until go-live and stabilization. I have also been responsible for risk identification, escalation management, and ensuring that documentation and governance standards are maintained throughout the project lifecycle.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my project management experience can support Pertemps ERP's SAP transformation initiatives.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
