I am writing to apply for the Werkstudent*in 20 h (m/w/d) NGO & Customer Support position at bcause GmbH. What draws me to this role is the opportunity to work at the intersection of community support and social impact, helping NGOs and donors connect more effectively through structured, empathetic communication.

In my professional experience as a Web Developer, I have developed strong organizational and communication skills while collaborating with diverse stakeholders, managing support workflows, and building systems that improve team efficiency. I am comfortable taking ownership of processes, whether it involves setting up a ticket system, maintaining a help center, or ensuring that inquiries are resolved promptly and clearly.

One area that particularly interests me is the chance to help build and structure bcause's support infrastructure from the ground up. I enjoy creating order out of complexity and have a natural affinity for learning new tools quickly. I am confident I can contribute to setting up an efficient ticket system and a well-organized help center that serves both the community and the internal team.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am currently studying Software Engineering at Voronezh State University and can commit to 20 hours per week. I would welcome the opportunity to discuss how I can support bcause's mission. I have attached my CV for your review.

Sincerely,

Md Shahanur Islam Shagor
