I am writing to apply for the SAP GTS Consultant position at Pertemps ERP. Your focus on logistics and supply chain operations in an English-speaking environment caught my attention, and I am interested in contributing to your team in Cologne.

My technical foundation is in full-stack development and system integration. I have worked extensively with PHP, Laravel, MySQL, and PostgreSQL, building scalable backend systems and integrating third-party services. I am comfortable with customising configurations, debugging, and maintaining complex systems in production environments.

In my professional experience, I have designed and maintained RESTful APIs, implemented authentication and role-based access control, and optimised database performance through query tuning and indexing. I have also deployed and maintained applications on Linux servers using Nginx, Apache, and Docker. These skills translate well into supporting and maintaining an SAP GTS landscape, where attention to detail, system reliability, and integration with modules like SD and MM are essential.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my technical background can support your SAP GTS operations.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
