I am writing to apply for the Werkstudent (m/w/d) Social Media position at spized GmbH. Your platform, which enables athletes to design custom jerseys using a 3D configurator, combines technology with sports culture in a way that I find genuinely interesting.

Although my primary expertise is in software engineering, I have developed a strong sense for design and visual communication through years of building user-facing web applications. I have worked extensively with Figma, Tailwind CSS, and Bootstrap to create clean, modern interfaces that are both functional and visually appealing. This experience has given me a practical understanding of layout, typography, color theory, and how design choices affect user engagement.

What stands out to me about this role is the opportunity to apply my design sensibility and technical mindset to social media content creation. I am comfortable working with visual tools, analyzing performance metrics, and communicating with partners in a structured way. I also bring strong English skills and a growing command of German, which supports the bilingual nature of this position.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am currently pursuing a Bachelor’s degree in Software Engineering in Russia and am looking for a hands-on role where I can contribute creatively while continuing my studies. I have attached my CV for your review and would welcome the chance to discuss how I can support your social media efforts.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
