I am writing to apply for the IT-Systemelektroniker position at think about IT GmbH. Your focus on continuous innovation and optimizing internal processes through modern technology aligns with my own approach to building reliable and efficient systems.

Through my work in software engineering and system administration, I have developed strong skills in hardware and software installation, configuration, and troubleshooting. I have hands-on experience setting up and maintaining Linux servers, configuring Nginx and Apache, and managing Docker containers. I am comfortable working with both client-side and server-side hardware, performing installations, upgrades, and repairs.

In my professional experience, I have resolved hardware and software issues, managed ticketing systems, and ensured that systems operate within defined service levels. I have also worked on deploying and maintaining applications on cloud platforms like AWS and Google Cloud, which required a solid understanding of infrastructure, networking, and system reliability.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background can contribute to the thinkGROUP team.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
