I am writing to apply for the Event Manager position at Brain Products GmbH. While my professional background is in software engineering, I bring strong project coordination, cross-cultural communication, and organizational skills that align well with the responsibilities of this role.

Over the past several years, I have worked on complex projects involving multiple stakeholders across different countries and time zones. In my role as a Web Developer at Explo-IT, I coordinated with internal teams, external partners, and clients to deliver products on schedule. I managed feature planning, bug tracking, deployment timelines, and vendor communication, all of which required structured planning and clear communication.

One area that particularly interests me is organizing international events that connect the scientific community. Brain Products GmbH's work in neuroscience and brain-computer interface technology is genuinely fascinating. I understand the importance of creating seamless experiences for researchers and professionals attending conferences, webinars, and workshops, and I am confident my organizational approach would contribute positively to your event strategy.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments. I am also willing to travel internationally as needed.

I have attached my CV for your review. Thank you for considering my application. I would welcome the opportunity to discuss how my project coordination and organizational skills can support Brain Products GmbH's global event operations.

Sincerely,

Md Shahanur Islam Shagor
