I am writing to apply for the SAP SuccessFactors Consultant position at Pertemps ERP. Your focus on supporting HR transformation projects for a leading IT and consulting client aligns with my interest in working on complex, enterprise-level systems that require both technical depth and strong client communication.

Through my professional experience as a Web Developer, I have developed a structured approach to understanding client requirements, designing scalable solutions, and managing integrations across different platforms. I have worked on projects that required careful analysis of business needs, translating them into technical specifications, and delivering end-to-end solutions that meet both functional and performance goals.

One area that particularly interests me is the integration of systems. In my previous work, I have designed and implemented integrations between custom-built applications and third-party services, including payment gateways, authentication providers, and cloud storage platforms. This experience has given me a practical understanding of how to connect different systems, manage data flow, and ensure reliability across integrated environments.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background in system design, integration, and client communication can contribute to your HR transformation projects.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
