I am writing to apply for the SAP FICO Consultant position at Pertemps ERP. While my professional background is in software engineering and full-stack development, I bring strong analytical skills, experience with complex enterprise systems, and a structured approach to problem-solving that I believe would be valuable in this role.

Through my work as a Web Developer, I have designed and maintained scalable applications using Laravel, Node.js, MySQL, and PostgreSQL. I have experience analyzing business requirements, translating them into technical solutions, and ensuring system reliability through testing and performance optimization. This has given me a solid foundation in understanding how backend systems support business processes.

One area that particularly interests me is working with regulated environments and structured data workflows. I have built systems involving role-based access control, secure authentication, payment integration, and real-time data synchronization. These experiences have taught me to prioritize stability, documentation, and clear communication when delivering solutions.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background could contribute to your team.

Thank you for your consideration.

Sincerely,

Md Shahanur Islam Shagor
