I am writing to apply for the Werkstudent Projektmanagement & W˜rmetechnik position at Enloc. Your focus on developing sustainable, efficient heating solutions and optimizing internal processes is something I find genuinely interesting. I am currently enrolled in a Software Engineering bachelor's program at Voronezh State University of Forestry and Technology, Russia, and I am looking for an opportunity to contribute to real engineering projects while deepening my understanding of energy systems and project coordination.

One area that particularly interests me is the intersection of technical development and process optimization. In my academic research, I have worked on designing secure systems and analyzing data to improve performance and reliability. These experiences have taught me to approach problems methodically, document findings clearly, and support continuous improvement â skills that directly apply to planning, coordinating, and optimizing projects in the heating technology domain.

Through hands-on project development, I have built full-stack applications that required careful planning, requirement analysis, and cross-functional coordination. For example, I developed a real-time server health monitoring dashboard that involved scheduling data collection, analyzing system metrics, and presenting results in a clear, actionable format. This project strengthened my ability to work with data analysis tools, manage timelines, and communicate technical results to stakeholders.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my background in engineering, data analysis, and process support can contribute to Enloc's projects in sustainable heating technology.

Sincerely,

Md Shahanur Islam Shagor
