I am writing to apply for the Manager Social Art Director position at Starface World. Your focus on evolving social creative across owned, paid, and retail channels, while maintaining brand integrity and pushing creative boundaries, stands out to me.

My experience as a full-stack developer has given me a strong foundation in building visually engaging, responsive digital interfaces. I have worked extensively with React, Next.js, and Tailwind CSS to create user experiences that are both aesthetically polished and functionally reliable. This technical background allows me to understand how creative concepts translate into digital products across different platforms.

In previous professional work, I have collaborated closely with cross-functional teams to deliver projects from concept to deployment. I am comfortable managing multiple priorities, giving and receiving feedback, and ensuring that creative output remains consistent with brand standards. I also have experience working with creators and managing content workflows, which aligns with your need to source, brief, and manage creative collaborators.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
