I am writing to apply for the Shopify Entwickler:in / Shopify Programmer position at Nature Heart GmbH & Co KG. Your focus on building custom Shopify apps and backend logic for a growing premium brand caught my attention, and I believe my full-stack development experience makes me a strong candidate for this role.

Through my professional experience as a Web Developer, I have built and maintained scalable web applications using Node.js and Laravel on the backend, paired with React and Next.js on the frontend. I have worked extensively with REST APIs and GraphQL, designed database schemas in MySQL and PostgreSQL, and integrated third-party services such as payment gateways and external APIs. These skills directly translate to developing custom Shopify apps, implementing backend logic for carts, bundles, and discounts, and working with Shopify APIs and webhooks.

One area that particularly interests me is the frontend integration of backend logic into Shopify themes. I have strong proficiency in JavaScript, CSS, and HTML, and I have built responsive, user-friendly interfaces using modern frameworks. I am comfortable translating complex backend features into clean, functional frontend components that align with design and marketing requirements.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my experience can contribute to the continued growth of Nature Heart GmbH & Co KG.

Sincerely,

Md Shahanur Islam Shagor
