I am writing to apply for the Senior Content Strategist position at SalesPlaybook AG. The role of turning busy experts' knowledge into content that genuinely moves their business is something I find both practical and meaningful.

What stands out to me about SalesPlaybook is the focus on founder- and executive-led content as a real pipeline channel. The challenge of extracting sharp insights from experienced professionals and shaping them into content that sounds authentically like them requires strong listening, structured thinking, and clear writing. These are skills I have developed through years of working directly with clients and stakeholders across technical and non-technical domains.

In my professional experience, I have managed end-to-end communication with clients, translating their ideas and requirements into structured documentation, reports, and project deliverables. I have run regular check-ins, kept timelines on track across multiple concurrent projects, and ensured that every deliverable met the client's expectations. This has given me a practical understanding of how to draw out expertise from busy professionals and turn it into clear, actionable output.

In addition to my communication and project management experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my background in client communication, structured writing, and project ownership can contribute to your team.

Sincerely,

Md Shahanur Islam Shagor
