I am writing to apply for the Nachhaltigkeitsberater:in position at EurA AG. Your firm's focus on guiding companies, research institutions, and municipalities through technological innovation from concept to market entry is compelling. The opportunity to contribute to meaningful sustainability projects that address global challenges is what draws me to this role.

Through my professional experience as a Software Engineer, I have developed a structured, analytical, and independent working style. Building full-stack web applications with Laravel, Next.js, and React has required me to break down complex requirements, design efficient systems, and deliver reliable results. This technical discipline translates directly to the methodical approach needed for developing sustainability strategies, conducting materiality analyses, and managing ESG data processes.

One area that particularly interests me is the use of data to drive decision-making. In my work, I have built and integrated RESTful APIs, optimized database queries, and implemented real-time data features. These skills are directly applicable to supporting ESG data processes, preparing sustainability ratings like EcoVadis, and conducting climate risk analyses. My ability to analyze regulatory requirements and translate them into practical, actionable steps has been honed through years of interpreting technical specifications and client needs.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application. I look forward to the possibility of contributing to EurA AG's impactful work.

Sincerely,

Md Shahanur Islam Shagor
