I am writing to apply for the Senior Marketing Manager position at apoplex medical technologies. Your focus on using AI-powered software to help medical professionals detect stroke risks early is a mission I find genuinely important, and I would welcome the opportunity to contribute to it.

My background is in software engineering and AI, with a strong focus on practical implementation. I work with LLMs daily for research, content drafting, and data analysis. I have built and integrated AI assistants into production systems using OpenAI and other APIs, which gives me a hands-on understanding of how AI can be used as a lever for efficiency and insight generation.

One area that particularly interests me is the combination of strategic thinking with technical execution. In my professional experience, I have taken projects from concept to deployment, making decisions on architecture, tools, and workflows along the way. This has required me to be analytical, data-driven, and comfortable with ownership. I am used to starting from scratch and building systems that work reliably.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
